Trade that we have commenced

manufacturing Boots and Shoes, and

and solicit an inspection of our Stock.

TERWILLIGER & FULLER

Belleville, March, 1878.

THE DOMINION

COAL OIL COOKING STOVE.

Burns Coal Oil at an expense of One Cent in

the fire, without smoke or smell, and

does every variety of cooking in a very

superior manner.

BAKES bread, biscuits, apples, potatoes,

cakes, pies, &c. Roasts meat, fowls and

birds to perfection. They are not subject to

be dried up as is the ordinary method by the

excessiveness of the heat.

Boils and steams vegetables, puddings, and

all kinds of meat. Roasts or fries steaks,

oysters, tomatoes, &c. Boils flat irons, glue

pans, tallow and linseed oil, and is

admirably adapted for drying photographs.

It is simple and neat, occupies but a small

space upon a kitchen table, is always ready

for use, requiring only a notch for kindling

and can be extinguished at pleasure.

The best can be regulated to a nicety, and

is not subject to those variations to which

all other fires are liable. This will be appre-

ciated by the landowner, or the lady who does

her own preserving. There is no smoke,

inconvenient odor, dust, or noise.

Families of any size may use their electric

cooking with this stove. To students, clerks

and all who desire to study economy, it is in-
valuable. The saving in fuel alone is de-

terminable.

The sick room, the nursery, the counting

house, the workshop, will be manufactured to

convenience. As a summer cooking stove it

is unequalled, as it does not heat the house.

The stove will be manufactured to meet

the wants of all.

Murder in Newark, N. J.

The Warehouse Security Company.

Arrival of Christian Brothers.

SPRINGFIELD, Mass., Sept. 9.—Census results received by the Springfield Republican on one o'clock this morning, under Butler's draft by a decisive majority in Wednesday's convention absolutely certain.

New York, Sept. 9.—Weather clear and pleasant.

Jacob Schoonover, school keeper in Newark, N. J., struck Jacob L. L. L., his cousin, a heavy blow back of the head, causing almost instant death.

It is reported that the troubles of the Warehouse and Security Company were due to its relations with some of its directors. It is believed that the losses will fall largely upon the directors and the company.

Twenty-four young men belonging to the Catholic Church arrived yesterday in the steamship Italy. They have been selected to serve as teachers in Roman Catholic parochial schools about to be established throughout the United States.

Afternoon Despatches.

The Very Latest.

DESPATCHES TO 4 P. M.

MADRID, Sept. 9.—There has been some modification in the Ministry since its announcement yesterday morning. Señor Berge, who was first named for the Minister of Justice, has been appointed Minister of Public Works, instead of Señor Cervera, and Señor Berge has been placed in command of troops in Valencia, Gen. Salcedo succeeds Gen. Campes as commander of troops in the north.

Vice-Admiral Sir Hastings Pleydell, commander of the British squadron in the Mediterranean, has been appointed to the command of the British fleet in the Atlantic.

SALT is a simple remedy for many things. It will cure sick headache, make cream fresh, make the butter come, take ink out of cloth of any kind, kill weeds, kill worms, make the ground cool, that is more general to celery, cabbage, etc.; also the itching pain caused by irritant skin diseases, like lichen, itch, etc.; produce cooling or stop it, as you like; and many other things too numerous to mention.

The rural editor of a Western paper has discovered an insect that will destroy the potato-bug. The new bug, he says, is the potato-bug, and it is a very common insect.

Petroleum as Gas.

The second is an account of a
test:

PITTSBURGH, Aug.

The long unsolved problem of the
ful manufacture of illuminating gas
petroleum has at last yielded to the
ent experiments of a Pittsburgher.

But the present no practical
been made of his method of c
petroleum into gas, and the coal
and other croakers have pooh-pooh
idea and prated of "residuum" and
demonstrations" and "villainous smel
"dangers" until, let it be confess
little faith was left in its ultimate

Recently, however—June 24th, 1885—patents were granted to Mr. [unclear] and since that time a company formed by a few capitalists here have been preparing for a final test of the method, which was consummated last night in a decisive manner for our great staple.

pendent visited the works to-day. report that no single defect can be in the method, and no shadow of can exist that coal will be everywhere by petroleum for the n

At another time I will give such a description of the machine itself as will be easily understood by the dullest. At the present let a recital of the

These results are the fruits of no patient labor and profuse expenditure of money by the patentee. The difficulties to be overcome, and which have been so often asserted could not

The gas made by Mr. Gearing subjected to the following test :

Over one hundred feet of the

inch pipe were coiled in a small tank surrounded by ice and salt until the temperature was reduced to fifteen degrees below zero. The petroleum gas combustion--passing through this coil--was continued for one hour and forty minutes, with

abatement of its brilliancy. It turned off and the pipe thawed it was found that not more than drops of water—pure water—condensed in the coil during the

coil was then repacked and the flow of coal gas was turned on. At the end of two hours it ceased to burn, the flow having become stopped by the condensation. When this pipe was thawed, nearly a quart of tar and water was taken out.

So much for condensation. that in the northern latitudes almost if not quite, impossible coal gas in winter on this account. *leum gas is free from this objection*

Again, concerning the residue
torts. I examined the retorts
ing's invention after twenty thou
feet of gas had been made, and
entirely free from any appearan
dum.

When the philosophy of his c
of retorts is understood it becom
that residuum can never accum
in. To secure this last result h
most difficult of all the labors o

Now that these two last objections to petroleum as a gas producer are settled, may we not confidently expect a change to take place in the trade by the use of oil for gas making?

Comparing the cost of petroleum
that of coal gas we find that the
less by more than one half. The
sharpburg, containing twelve
cubic feet, was filled from thirty

At this rate sixteen thousand cubic feet of gas can be made from one barrel of oil. The gas thus produced was fully equal to the best coal gas made. How

Gearing does not propose to use more than ten thousand cubic feet of gas from petroleum, but that much used.

other I have ever seen. The shades of green and blue were distinguished by this light alone—other light can withstand.

It is free from smoke. A w

held directly over the flame was colored even the slightest particle burner was perfectly cool to with hundredth part of an inch of the

Here is something deserving

greatest attention—opening up
a very desirable use for our petrol
is now so low, and at the same time
fitting the gas consumer as well as
companies. We recommend
managers of our own gas companies

draw their attention more particularly to the statement that coal gas was converted into petroleum gas was comparatively trifling cost, and claimed and alleged to be true, that tax would be for the company and

SHIPPING TAX ABOLISHED.—The import or surtax on foreign ships has been abolished. It was expected

a large revenue, but it failed to provoke reprisals. It discriminated against British shipping, and its removal was a gain to our tonnage as well. Havre and French ports, from which British goods came, preferring Hamburg

Welland Canal Enlargement.

Notice to Contractors.

SEALED TENDERS, addressed to the

Welland Canal, will be received at this

office until the day of SATURDAY, the

EIGHTH day of OCTOBER next, for the

construction of a new and improved

regulating Weir, a number of Bridge Abutments

and Piers—the excavation of the Lock

and Weir Piers—the interesting Reach, Raceways, &c. on the new portion of the

Welland Canal, between the Lock and Port

Dalhousie.

The work will be in sections, six of

which, numbered respectively 1, 2, 3, 4, 5,

and 6, are situated between Port Dalhousie

and the Lock, and the remaining three

(numbered 7, 8 and 9) extend from the

Lock to near Brown's Cement Kilns.

Tenders will also be received for the

enlargement and deepening of the locks of the

present Canal between Port Dalhousie and

the Aqueduct at Welland; work to be let in

sections each about a mile in length.

Tenders are also invited for the completion

of the deepening and enlargement of the

Harbour at Port Dalhousie.

Maps of the several localities, together

with Plans and Specifications of the work,

can be seen at this Office, on and after

THURSDAY, the TWENTY-FIFTH day of

SEPTEMBER instant, where printed forms

of Tender will be furnished. A like class of

information relative to the works north of

Thorold, may be obtained at the Resident

Engineer's Office, Thorold; and for the works

at and above Port Dalhousie, Plans, &c. may

be seen at the Resident Engineer's Office,

Welland.

All Tenders must be made on the printed

COAL OIL COOKING STOVE.

Burns Oil at an expense of One Cent in the

Hour, without smoke or smell, and

does not require of Cooking in a very

superior manner.

Bakes, boils, and simmers, potatoes,

meats, and all kinds of food, and

boils to perfection. They are not subject to

be kindled up in the ordinary method by the

carelessness of the cook.

Boils and steams vegetables, puddings, and

all kinds of meat. Boils or fries steaks,

oysters, tomatoes, &c. Boils flat iron, and

boils tall and tapers the iron for a good

and admirably adapted for drying photographs.

It is simple and easy to use, and it saves

space upon a kitchen table. It always ready

to use, requiring only a match for kindling

and can be extinguished at pleasure.

The heat can be regulated to a safety, and

is not subject to those variations to which

all other fires are liable. This will be

appreciated by the landlady, or the lady who

does not use a servant. The stove is a most

pleasant and safe, and does not smoke.

Families of any size may use their entire

cooking with this stove. To students, clerks,

and all who desire to study economy, it is

indispensable. The saving in fuel soon de-

pays for the stove.

The clock, ring, the nursery, the counting

house, the workshop, will soon become

useful. As a Summer Cooking Stove it is

unequalled, and it does not burn the fuel.

The stove will be manufactured to meet

the wants of each.

The Royal Commission

THE ROYAL COMMISSION
—
INVESTIGATION OF THE CHARGES
AGAINST THE GOVERNMENT.
—
THE TESTIMONY.
—
Special Telegram to the Intelligencer.
—
NINTH DAY.
—
OTTAWA, Sept. 15.
The Commission met at noon. Sir John
Macdonald, Hon. Messrs. Lange, Campbell
Tupper, Mitchell and Aikins were present.
E. R. Burpee of St. John was first called; and
deposed that he knew Sir Horah Aikins

W. McMillen; became acquainted with McMillen in 1872; was appointed Director of the Eastern Pacific Company in 1873; was told by McMillen that an agreement existed between the Americans and Sir Hugh to build the Pacific Railway. The Americans were to furnish the capital to build the road; understood McMillen represented a large number of American capitalists; did not know that the Government favored these negotiations with the Americans. Believed they rather once

The Government Director by Members of the Government from Mr. W. Brunswick, who asked to become a Director in the Intercolonial Company. He understood from Mr. Mitchell, Mr. Tilley and other members of the Government that the Railway was to be built with British and Canadian capital. Also understood that the Inter-Oceanic and Canada Pacific Companies would be amalgamated as stated by the Government, consequently did not think it of much consequence which Company he joined. Was quite horrified the Government were opposed to the introduction of the American element. Before becoming a Director had talked over the terms of the Charter with different persons. The Company was to be entirely Canadian. Stock was distributed without object in view. Was given to thirty Directors to be divided among the different provinces. New Brunswick was to have

Non premium was allowed to be put upon the thirteen Directors asked upon equal to say. Did not think the terms given by Government were very liberal. In former Company thought there was some money to be made on this Railway. In Chartered Company did not see much to be made. Knew nothing of the alleged understanding between the Government and Sir Hugh. Any money spent in Brunswick was furnished by candidates or their friends. Did not believe money came from the Upper Provinces. Had seen some of the letters alleged by McMillen to have been written by Sir Hugh. McMillen told him he had advanced money to Sir Hugh to meet the expenses of organizing the Company.

In reply to Sir John, witness said he had been engaged in railway enterprise after 1860 years. Was interested in the Pacific Rail-

for the last five years. Was not asked by Hugh to become a Director. Believed Hugh was opposed to his appointment. (Witness) subscribed on behalf of New Brunswick one-thirtieth and paid one tenth. The subscribers were Canadians. There was to be no transfer of stock without the consent of Government. First step in railway enterprise was to raise money for organization and other expenses, under Charter of this present Company. It was impossible for Americans to take stock. Witness gave a list of names of subscribers for stock in New Brunswick.

Hon. Mr. Campbell was the next witness. He had been a member of the Cabinet since 1872. He had no knowledge of any agreement between Sir Hugh and the Americans; was not personally aware that negotiations were going on between Sir Hugh and the Americans. The Government order encouraged such negotiations.

tions; but were entirely opposed to such a scheme, and decided the absolute exclusion of American capitalists. After the session of 1876 it was pronounced the policy of the Government to build the Road entirely with British and Canadian capital, and to bring about an amalgamation of the two Canadian Companies. Read McMillen's letter in the *Montreal Herald*. Sir Hugh never received encouragement from the Government in his American negotiations. Witness went to Toronto in October in 1879 on behalf of the Government to try and bring about an amalgamation between the two Canadian Companies; but he failed; some time afterwards Sir Hugh went to Toronto to make a last attempt. Perhaps thought the lands on the Niagara Highway must fall into American hands; and (Campbell) showed McPherson that the Government would so guard the Charter and give

guarantees that it would be "impossible" for Americans to secure control of lands on the West coast; several of the inter-oceanic lines were quite satisfied with these guarantees. The Province wanted it stipulated that the Province should be absolutely excluded from the Presidency of the Company; the Government in turn held control over the Company as a first step of the proceeding; the guarantees were perfect. Did not know whether Sir Macdonald took these efforts to amalgamate at that time, though that during the session of 1870 Sir Macdonald was informed that Americans would be excluded. After the failure of the attempt at amalgamation, the Government decided to have a company formed under an Act passed, which would represent every Province of the Dominion and give each Province a proportional influence in the Company. The desire of the Government was to secure men, wealth, and railway experience. Much the

was given to the formation of the charter. Delivered its provisions were as perfect as could be framed, having to view the interests of the whole country. The opinion of railway men was that the charter was too stringent and too harsh on the Company. Knew nothing of the sums of money said to have been furnished to Sir Hugh to the members of the Government. Judge Day here read Cartier's letter of January 1846.

Witness said he never saw this letter or knew nothing about it. Was told by Sir John Kingdon, after his election, that Sir Hugh had subscribed to the elections. Did not know there was any agreement to give the charter to Sir Hugh. He (witness) was to a position to know all about the charter. Thereafter was an agreement between the Government and Sir Hugh, or any one else, by which the charter was to be given for any consideration.

Government never at any time promised to charter to any one. Was positive such a thing had never occurred. It was absolutely impossible.

In reply to Sir John, Mr. Campbell said that matter what company might be formed to work the terms in the present charter would be left up to an agreement made between any individual member of the Government and the company would have been perfectly lawful. Sir George Carlier was always opposed to American control. Had Carlier made an agreement to give

SPECIAL NOTICES.

VOID QUACKS.

A victim of early

premature decay, he, having tried in vain

every advertised remedy, has discovered

a simple means of recovery, which he will

share with the world. Address

J. H. REEVE, 78 Nassau street,

New York.

THE introduction of Dr. Whipple's Compound

of Food and Nature, and its

beneficial effects, is a subject of

importance to the public. It is

based on physiological principles, and

is a purely scientific preparation, com-

posed of the most valuable

ingredients for the formation of the

blood, and may be taken with benefit

in all cases of general debility and

weakness, and in all cases of

debility from whatever cause. It is

especially adapted to the young, and

is a valuable remedy for the

debility of the aged. It is

Morning Despatches.

GREAT BRITAIN.

The British Iron Trade.

A Report Contradicted.

LONDON, Sept. 18.—Mr. Cais, iron merchant

of Liverpool, in a letter to the press, admitted

that the report of a probable purchase in New

York for shipment to England, and says he

trusts that the American trade is not

England.

Private advice contradicted the London Times

report that the bombardment of Charleston had

commenced.

American Despatches.

Yellow Fever at Memphis and

Shreveport.

A Propeller Burned.

WATKINSON, N. Y., Sept. 17.—The propeller

Acorn, of the Vermont Central line of steamers,

on route from Ogdensburg to Chicago, was

burned to the water's edge this evening at Col-

lins dock, about five miles above Alexandria

Bay. The passengers and crew were saved.

She was heavily laden with general merchandise,

and was lost.

Memphis, Sept. 17.—Nine deaths from yellow

fever today. The disease does not seem to be

spreading.

Shreveport, La., Sept. 17.—There seems to be

some decrease in the number of new cases

of fever in the thickly settled portions of the

city today, but an increase in the suburbs,

where there have been but few cases heretofore.

Afternoon Despatches.

The Very Latest.

DESPATCHES TO 41 P. M.

NEW YORK, Sept. 18, 1873.—There is very

great excitement on the street in consequence

of the announcement of the failure of Jay

Cooke & Co., and the question is generally

asked: "What is next?" Stocks took a tumble

generally, of 10 to 15 per cent, caused as

much by apprehension of the future as by the

actual condition of affairs.

Jay Cooke will make an authoritative statement

this afternoon, that speculation is only

temporary.

Philadelphia, Pa., Sept. 18.—The following

card has been posted on the office door of Jay

Cooke & Co. in this city: "We regret to be

obliged to announce that, owing to unexpected

demands on our office, we have been obliged to

suspend payment. In a few days we will be able

to present a statement of our affairs to our

creditors, until which time we must ask for

their patient consideration. We believe our

assets to be largely in excess of our liabilities.

Signed, Jay Cooke & Co."

New York, Sept. 18.—The suspension of Jay

Cooke & Co. is only temporary and no business

will be transacted to-day. It is understood

that all parties will be protected.

The recent state of affairs in New York has

caused considerable excitement in the money

market, and a large volume of business has

been transacted.

The suspension of the Midland Railway Co.

is said to have something to do with the

announcement of the Northern Pacific Road, and

it is rumored, has caused a considerable

travelling.

A despatch from Washington says the First

National Bank has succeeded.

SPECIAL TELEGRAM.

FROM ST. JOHN, N. B.

GREAT FOUR-OAKED BOAT RACE.

THE "PARIS" CREW VICTORIOUS.

ST. JOHN, N. B., Sept. 18.—The four-oared

race was started at 8:30 a. m. The water

was smooth and glass, and the weather cool

and pleasant. The Longshore crew, of

Portland, Me., took the lead at the start, the

McLaren crew, of St. John, second; the

Paris crew, third, and the Indivict crew, last.

The latter evidently out of the race. At the

end of the first mile the boats were

still in the same relative positions. At the

turn the Paris crew lead, closely followed

by the Longshore crew, McLaren third,

and the Indivict crew last. On the home stretch the Paris crew

followed the Paris crew closely. The latter

won by half length; McLaren's crew a

good third. Time: 87m. 30sec.

Butler's

Blackberry Cordial.
THE most reliable preparation for Summer Complaints ever brought before the people. Since its introduction thousands have experienced the greatest benefit from its use. The lives of hundreds of children have been saved by the use of this most valuable preparation. No family should be without **Blackberry Cordial**. It is pleasant to take, perfectly harmless, free from opium, and will certainly cure the worst cases of Summer Complaint when the child is in the fall.

Be sure and ask for BUTLER'S BLACK-BERRY CORDIAL, and don't allow worthless preparations to be palmed off on you. For sale by Druggists generally, and prepared only at **APOTHECARIES HALL.**

A BY-LAW TO RAISE BY WAY OF LOAN
THE SUM OF TWO THOUSAND DOL-
LARS FOR THE PURPOSE OF CON-
STRUCTING A FOOT BRIDGE ACROSS
THE RIVER MOIRA.

Belleville, April 27, 1873.

This image shows a blank page from a document. The paper has a light beige or cream color. At the very bottom, there is a dark, almost black horizontal band, which appears to be the edge of the scanner bed or the binding of the book. There is no text or other markings on the page.

What is said of Butter.

When a wholesale dealer is questioned as to the proportion of really fine butter he receives in his consignments, he replies, "five per cent." A large proportion thus can tell you that all his stock good butter is the most difficult to procure, and costs him more time and trouble to secure. We know there is no good reason why this should be. Here and there scattered widely apart through the country, we know farmers who make excellent butter, which would make a fine quality of butter, and next door to these are neighbors who make trash that is not worth the name. On the contrary, some of the country are widely different in color, flavor and texture. One farmer is careful and cleanly, his wife keeps her dairy sweet and her milk pails perfectly pure; another keeps a foul stable, fills in an unclean fashion his rusty pails and foul water for his cows, while his wife is equally careless in her dairy. How can the butter in these two cases be other than widely different in quality and value.

A man is by nothing so much himself, as by his temper and the character of his passions and affections. If he loses what is mainly and worthily in these, he is as much lost to himself as if he loses his memory and understanding.

A horse got on the railroad track near Montgomery, Ala., last week, and actually led a swift train for over a mile. It would have utterly terrified it, only he cannot be said to see "how the old thing worked," and stumbled into a culvert, where he lay unharmed while the following train passed on in triumph.

A Rhode Island blacksmith has succeeded in changing the shape of a horse's horn, to that of a trotter, by simply fastening an extra pair of shoes between the usual toe and the hoof, when he wants the horse to trot, and taking them off at all other times. The sudden change of weight on his fore feet forces the horn to change its own.

The London Bridge gives the following dimensions of a bridge to be constructed over the Firth of Forth. The structure will be by far the largest bridge in the world. It will be 100 feet in height, and will contain nearly 100 spans. The greatest span in the center will be 1,000 feet, and within nearly a third of a mile in extent, dimensions which are without parallel for any similar piece of architectural construction; and the smaller opening or spans will be 150 feet in width, being considerably beyond the average dimension of the largest spans in ordinary bridges. It will cost at least \$10,000,000.

GRAND JUNCTION RAILWAY.

General Meeting of the Share-

holders.

The Annual General Meeting of the Share-

holders of the Grand Junction Railway

SPECIAL NOTICES.

VOID QUACKER—A victim of early

indication, showing nervous debility

and general weakness, has discovered a

simple means of recovery, which he will

send free to the following: Address

to H. NERVEN, 25 Nassau street, New

York.

THE introduction of Dr. Wheeler's Compound

of Quinine and Iron, as a popular medicine, is

evidently a great benefit to the public. This

compound is a perfect tonic, and its use

A New Phase of the Crisis in New

York.

Trouble for the Shipping Interests.

Chicago, Sept. 25.—The Clearing House

Association simply follows the example of the

New York banks in deciding to suspend pay-

ment of large sums of currency, while still per-

mitting ordinary business checks presented at their

counters. This course has been generally per-

sued by the banks in New York, and is not

generally feeling is still one of confidence that

present difficulties will soon disappear.

St. Louis, Sept. 25.—The banks to-day adopted

the New York plan of clearing house cer-

tificates, and resolved to pay out small checks in

currency; all others to go through the clearing

house. Richmond, Va., Sept. 25.—A special tele-

graph message from the banks in Danville

announces that the banks in Danville, including

the Farmers' and Merchants' Bank, the Bank of

America, and the National Bank, have sus-

pended their business. The Farmers' and Mer-

chants' Bank, in Danville, is still paying.

A public meeting was held in Petersburg

for the purpose of recommending the use of

certified checks. Lancaster, Pa., Sept. 25.—Prof. Ber-

Irish Quagmire.

Sure Patrick to Biddy, "Good mornin', my dear!"
"The bit of a scoundrel I've got for a partner!"
"It's no wonder that you're so angry!" says she.
"The bit of a scoundrel I've got for a partner!"
"It's no wonder that you're so angry!" says she.

"Arrah, then," cries Patrick, "it's thinkin' as you are!"
"The bit of a scoundrel I've got for a partner!"
"It's no wonder that you're so angry!" says she.
"The bit of a scoundrel I've got for a partner!"
"It's no wonder that you're so angry!" says she.

"I gave it away to a good lookin' boy,"
"The bit of a scoundrel I've got for a partner!"
"It's no wonder that you're so angry!" says she.
"The bit of a scoundrel I've got for a partner!"
"It's no wonder that you're so angry!" says she.

"Arrah, then," cries Biddy, "an, where are you?"
"The bit of a scoundrel I've got for a partner!"
"It's no wonder that you're so angry!" says she.
"The bit of a scoundrel I've got for a partner!"
"It's no wonder that you're so angry!" says she.

"You are a brack," a certain college Professor had assembled his class at the commencement of the term, and was reading over the list of names to see if all were present. It chanced that one of the numbers was unknown to the Professor, having just entered the class.

"What is your name, sir?" asked the Professor, looking through his list.
"You are a brack," was the startling reply.

"That is intolerable," said the Professor, his face reddening. "Hear you, young man, how you attempt to insult me!"

"I am not, sir," said the student, in a tone of submission. "How dare I?"
"Did you not say I was a brack?" returned the Professor, with studied indignation.

"No, sir," said the student, "I answered your question. My name is U. R. A. Brack—Urah—Kegold—Anderson Brack!"

"Which side of the street do you live on, Mrs. Kipple?" asked a counsel, cross-examining a witness.—"On either side, sir. If you go one way, it's on the other side; if you go the other way, it's on the left."

When I think, says Alphonse Karr, how everything we live under, live in, live on, and live off, has suffered, I am not content with a profound horror for all trouble, anxiety and fear. I only think of living quietly and thoughtfully, and wonder at those who, having but two hours to sleep, spend those two hours in making and turning over their bed. It looks to me as if all those people who are always catching cold, in order to attain to, I don't know what, more furious madmen, I understand that great philosopher had discovered the true reason for cities being so full of disease.

The conditions of life.—One tenth down and balance in three months from day of sale.

For further particulars apply to the subscriber. H. JONES, 313-314-21.
